Better Than Ever

Building Quality Boats by Combining Experience with Technology.

Every Achilles boat produced represents the marriage of our years of experience with the most advanced technology in the industry. Our modern plant was designed solely for the production of inflatable boats, and its computerized manufacturing and design systems insure speed, efficiency and, most importantly, quality. This allows us to quickly incorporate design and feature innovations into our boats so our customers are always buying the most advanced inflatables available.

Still, experience teaches us that there are some things technology cannot replace. We make our boats with Hypalon® and Neoprene® - reinforced fabric because time has proven this to be the best overall fabric for inflatable boats. No plastic alternative can approach its overall durability and air retention qualities. Even though Hypalon requires old fashioned hand gluing, we take this step to insure Achilles boats remain the best possible.

The Best Fabric

Every Achilles boat is made with our proven four-layered fabric. A Hypalon-reinforced outer layer provides unsurpassed toughness and protection from the elements, oil, gasoline and abrasions. The tightly woven core fabric provides rigidity and is kept airtight by two interior layers of Neoprene, an elastomer with outstanding air retention qualities.

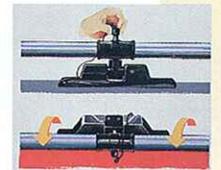

Outstanding Seam Construction

Achilles seams are overlapped a full inch and reinforced with seam tape both outside and inside for extra safety. No other inflatable manufacturer takes all these steps to insure seams will last.

Non-Corrosive Check Valves

All Achilles valves are non-corrosive and double-capped for safety. They allow for easy "one-way" inflation and fast deflation by unscrewing the valve.

A Smooth and Simple Oar System

We invented the fold-down, locking oar system with two-piece collapsible oars which makes rowing a breeze while keeping oars safely secured and out of the way when not in use.

Baffles that Adapt to Air Pressure

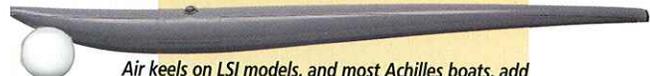

The interior baffles on Achilles boats not only keep individual air chambers completely sealed for safety, they also have a flexible cone design which works to equalize air pressure between compartments.

The new Achilles AirFirm™ Floor boats: Demonstrating the synergy of experience and technology.

The new Achilles LSI Series is the result of experience combining with technology to produce a revolutionary new boat filled with proven quality features. We developed the industry's only Hypalon drop-stitched air floor and merged it with a custom designed air keel to maximize its effectiveness and boat performance. The result is a remarkably lightweight boat with a smooth, firm air floor that does not sacrifice toughness or performance for convenience.

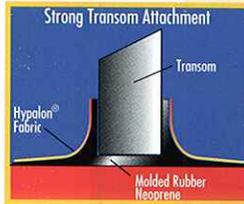

Thousands of polyester threads provide firmness to the industry's only Hypalon drop-stitched air floors.

Air keels on LSI models, and most Achilles boats, add firmness and stability while enhancing performance.

Achilles has introduced innovative floor systems over the years, from interlocking wood and aluminum floorboards to inflatable and rollup floors. With the new AirFirm™ floors, Achilles is once again leading the way.

Transoms Built to Handle the Stress

Transom failure is a common problem on some inflatables. Achilles transoms are secured to the fabric by a unique Neoprene rubber mold and transom tape combination, and not just one or the other.

FIVE-YEAR WARRANTY ON FABRIC AND SEAMS

We back our claim to having superior fabric and construction with a strong warranty commitment.

LT-2 Achilles

LS* Achilles

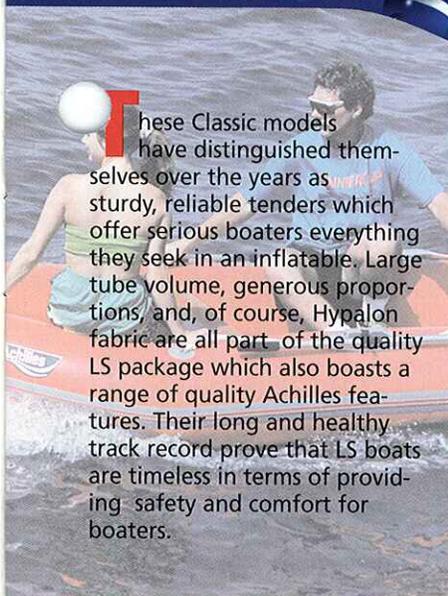

Our most economical dinghy is more convenient and practical than ever before. But it's still made with the same tough Hypalon®-reinforced fabric as all our larger boats and backed by the same five-year warranty. The LT-2 comes with a wood seat, fold-down oars and fold up floors. This lightweight wonder will store virtually anywhere without sacrificing anything in terms of safety. The LT-2 is the best value you'll find in an economical dinghy.

Standard Features Include:
Fold-up wood floor; full-length rubbing strake; fold-down locking oar system with two-piece breakdown aluminum oars with removable blades & tie-downs; bow D-rings; life lines with hand loops; adjustable wood rowing seat; large, non-corrosive check valves; motor mount; high-volume foot pump; carry bag; and maintenance kit.

SPECIFICATIONS

Color:	Lt. Gray
Length:	7'3" (220 cm.)
Beam:	4'0" (124 cm.)
Tube:	13" (33 cm.)
Weight:	40 lbs. (18 kg.)
Load Capacity:	690 lbs. (310 kg.)
Person Capacity:	2
Max H.P.:	2 Standard Shaft
Air Chambers:	2

These Classic models have distinguished themselves over the years as sturdy, reliable tenders which offer serious boaters everything they seek in an inflatable. Large tube volume, generous proportions, and, of course, Hypalon fabric are all part of the quality LS package which also boasts a range of quality Achilles features. Their long and healthy track record prove that LS boats are timeless in terms of providing safety and comfort for boaters.

LSI

Achilles

TWO NEW MODELS FOR 1999!

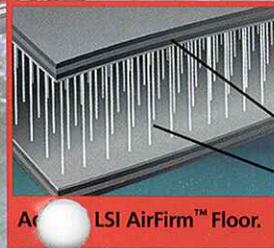

The instant popularity of our AirFirm™ Floor LSI Series introduced in 1998 has led to the addition of two new models for 1999. Achilles LSI models are the only inflatable boats offering Hypalon® - reinforced drop-stitched air floors. Supported by thousands of interior polyester threads, Achilles AirFirm™ floors provide an unparalleled tough, smooth firm deck. The additional support of air keels on most models not only increases floor rigidity, it also enhances the overall performance of these durable, lightweight tenders.

New for 1999 are the 9'6" LSI-96 and the 11'2" LSI-112. The LSI-112 answers boater demands for a larger AirFirm™ option. Weighing only 97 pounds, it can carry payloads up to 1620 pounds thanks to its 18" tube diameter. Like all LSI models, it is lightweight and incredibly easy to set up or store away.

Never before has such remarkable convenience been accompanied by so much quality. No other inflatable air floors offer the peace-of-mind of Hypalon, and no other inflatables offer the overall quality of an Achilles.

LSI-112

Achilles LSI AirFirm™ Floor.

Hypalon® Fabric
Polyester Threads

LSI Standard Features Include:

- Air keel (all models except LSI-77); Hypalon drop stitch AirFirm™ Floors; full length rubbing strake; fold down locking oar system; two-piece breakdown aluminum oars & oar holders; bow D-ring plus towing bridle D-rings; life lines; removable wood rowing seat; protective motor clamp; self-bailer valve; large high pressure foot pump with pressure gauge; carry bag; maintenance kit; floor protection pad for gas tank; and roomy square bow design.

SPORT TENDERS

LEX

Achilles

These popular sporty tenders have been re-engineered to be better than ever in 1999! A new sleek bow design not only improves their performance and appearance, it also allows for more interior space. And with a new, larger tube diameter, the load capacity is also increased so you can carry more gear than ever before. Add in other new features like molded rubber oar holders, and a sliding seat with a wider adjustable range to all the other great features that have made Achilles LEX boats so popular, and you have a value-packed, Hypalon® inflatables that offers you much more than competing models.

Standard Features Include: Hypalon®/Neoprene reinforced fabric; self-locking wood floorboards; fold-down, locking oar system with two-piece, breakdown aluminum oars; full-length rubbing strake; adjustable wood rowing seat; carry bag; foot pump; towing rings; protective transom motor clamp; lifeline and maintenance kit.

FIBERGLASS
TRANSOMS
NEW FOR 1999

Redesigned for 1999 with durable fiberglass transoms, these deluxe tenders are better than ever. These sleek tube lines allow for tube diameters to increase without limiting performance. Coupled with a new pointed, raised bow, SPD tenders carry more and perform better than ever before! Also standard are non-slip, foam-matted floorboards and a sliding wood seat which can be attached in two different locations.

Like all Achilles boats, SPD tenders are made with durable Hypalon®-reinforced fabric. Compare fabric, features and price with competing models and you'll see what a great value these boats really are!

Non-slip, foam-matted floorboards are standard on SPD boats.

SPORT TENDERS

HB**Achilles****NEW
FOR 1999!**

Achilles was a pioneer in the development of rigid-hulled inflatables and the brand new HB-330 represents the culmination of years of experience in manufacturing high-quality RIBs. Designed to function as a sporty tender, it's layered "V" fiberglass hull and large 17" tubes provide superb stability and buoyancy, while also enhancing maneuverability. It offers the same fold-down, locking oar system that has made Achilles boats so popular as tenders, as well as a wood seat and a white-ribbed, tear-drop rubbing strake to prevent marking yacht hulls as well as deflect spray for a drier ride. Interior safety line, lift and carry handles and towing bridle rings add to the HB-330's complete functionality as a tender. Still, its sporty performance and handling make it a fun boat to enjoy anytime. And naturally, like all Achilles boats, it is made with DuPont Hypalon for unsurpassed durability.

Model shown may not depict all final HB-330 design features.

SPORT BOATS

The SE-121 and SE-131 sport boats offer high quality, 12 and 13-foot Hypalon® inflatables at prices competitive with PVC boats and lower than other Hypalon inflatables! Yet you are still guaranteed Achilles-brand quality in a striking, new two-tone design which allows Achilles 1999 sportboats to stand out from all the imitators.

 with aluminum stringers;
 Hypalon/ Neoprene reinforced
 fabric; fold-down locking oar
 system with two-piece
 breakdown aluminum oars;
 lift & carry handles; helmsman
 safety grip; lifelines; remov-
 able dual position wood seat;
 high-volume foot pump;
 and maintenance kit.

SGX Achilles

The next generation of traditional soft-bottomed inflatable sportboats arrives with the 1999 Achilles SGX models. Loaded with a range of high quality special features, they now offer a more contemporary tube design to go along with their striking two-tone look. Superior features like aluminum floorboards, fiberglass transom, and deep "V" inflatable keel are standard, along with their super tough Hypalon® fabric. All these features plus famous Achilles quality make SGX boats an excellent value.

Standard Features Include:
Deluxe self-locking aluminum floorboards; fiberglass transom; double positional wood seat; bow carry handle; four lift and carry handles; towing rings; interior safety paddle; aluminum transom protection plate; high volume foot pump; carry bag; and maintenance kit.

SPORT BOATS

SG**Achilles**

Standard Features Include: Roomy square bow configuration; trigon air keel; aluminum self-locking floorboards with aluminum stringer system; fiberglass transom with protective motor clamp plate; fuel tank tie-downs; self-bailer valve; full-length rubbing strake; fold-down locking oar system (except SG-156); bow carry handle; lift & carry handles; towing bridle; helmsman grip; life lines; full-length splash guard; transom splash guard; removable bow spray-dodger, bow holdall fitting points; bow deck fitting points; cushion seat fitting points; large, non-corrosive check valves; large, high-volume foot pump; double carry bag system; deluxe maintenance kit.

These "top-of-the-line" models continue to set the standard for inflatable sportboats. Built for high performance with deep "V" trigon air keel hulls, Achilles SG boats offer a roomy, square bow configuration which provides room for extra gear, and an aluminum floor system which delivers superior traction, rigidity and durability. Achilles SG sportboats bring performance and practicality together for better water skiing, diving, fishing or all-around sportboating pleasure!

SU**Achilles**

Standard Features Include: Toughest double layer (840 denier each) nylon core fabric; trigon air keel; aluminum self-locking floorboards & stringer system; fiberglass transom with aluminum plate (exterior) & motor pad (interior); fuel tank tie-down; large self-bailer; extra-wide, heavy-duty, full-length teardrop rubbing strake; tie-down straps for paddles; bow carry handle, towing bridle; lift & carry handles; splash guard with life lines; heavy-duty reinforced cargo wear patch all around; extra tie-down D-rings; large non-corrosive recessed valves; two (2) high-volume large foot pumps; two deluxe maintenance kits.

SU Boats are built tough to work hard for rugged private and commercial use. They are made with an additional heavy-duty layer of 840-denier nylon fabric in a two-ply technique which results in a core fabric even stronger than a single base fabric of equal thickness. A number of exclusive features are built into these boats which combine to bring the advantages of an inflatable together with the demands of tough commercial marine use.
